Quadri Ismail

Product Designer · Fintech & B2B SaaS · AI-Native Products ·
Design Systems · Remote
Lagos State, Nigeria

Summary

Most designers work in one domain long enough to get comfortable. I have shipped products across Fintech, GovTech, Healthcare, and AI-powered SaaS — on platforms used by millions of people worldwide. I work fully remote with distributed teams and founders across Nigeria, Saudi Arabia, and international startups. I cover the full arc: early discovery, user research, design systems, prototyping, and production handoff. I use AI-assisted workflows with Claude and Cursor to move faster without losing craft. Work I have contributed to:→ Ryno Finance: 0 to 1 B2B financial platform, KYC and KYB onboarding→ Lean Business Services: AI analytics and medical coding SaaS→ Chisquares: global research analytics platform→ Federal Ministry of Education Nigeria: performance system for 67,000+ civil servantsResults shipped:◆ Cut design-to-dev handoff time by 15% with a unified design system◆ Reduced user errors by 70% on a blockchain onboarding flow◆ Sped up approval workflows by 80% on a national government platform◆ Lifted engagement and retention by 30% on an AI research platformOutside client work, I mentor product designers from African and emerging markets on turning their skills into steady income. Open to full-time and contract Product Design roles, fully remote. Experience

ryno
Founding Product Designer | Engineer
December 2024 - Present (1 year 9 months)
Edmonton, AB

rynopay® is a multi-portal cross-border payments platform serving customers, partner merchants, and internal compliance teams. I own design end to end,

from research and information architecture to production-ready code, using Claude Code, Figma CLI / MCP, and Cursor as build partners.

I consistently hand off working typed React components designed in Figma, prototyped in code, iterated live in the actual product which collapses the design-to-engineering loop from days to hours.

Impact:

- Designed three portals (Customer Wallet, Partner Merchant Console, Compliance Ops) for a 0 to 1 cross border payments platform, all composed from a single design system.
- Shipped typed React components prototyped in code with Claude Code and Cursor, collapsing the design to engineering loop from days to hours alongside a 5 person team.
- Owned account security UX end to end: KYC and KYB onboarding, MFA with authenticator apps and backup codes, and profiles built around trust signals.
- Delivered compliance tooling (Treasury, Suspense Queue, Webhook Monitoring) designed around exception paths, not happy paths.
- Set design QA standards and automated design token generation with Claude, cutting manual UI hours for the product trio.

How I work:

Design system: token layer plus custom designed component set, every screen composed from the same primitives

Prototyping in code: Figma into typed React and Tailwind, tested in the real app, not a static mockup

Accessibility: WCAG audits on my own work, focus management, one-time-code autofill on OTP inputs

Tools: Figma, Claude Code, Cursor, React, TypeScript, Tailwind CSS, shadcn/ui, Radix

Domains: B2B Fintech, Payments, Cross-border, KYC/AML, Compliance Ops, Authentication UX, Design Systems

Linqart

Product Designer

April 2025 - June 2026 (1 year 3 months)

London Area, United Kingdom

I led product design for Linqart, an all-in-one e-commerce product, on contract through Neoclan Technologies.

Designed interfaces serving consumer needs from electronics to home goods

Collaborated across teams to launch a service provider marketplace

connecting users with verified professionals

Integrated doorstep delivery and flexible payment options to reduce purchase friction

Lean Business Services

Senior Product Designer

December 2024 - April 2026 (1 year 5 months)

Riyadh, Saudi Arabia

I designed for two enterprise SaaS platforms: Lean Insight, an AI analytics and data governance tool, and AXN Terminology Engine, an AI-powered medical coding platform handling ICD-10-CM, CPT, and SNOMED CT classification.

Designed analyst-to-AI workflows letting finance, sales, and marketing teams query dashboards and act on data risks

Delivered the AXN design system end to end, now the standard library for all new AXN screens

Cut design-to-development handoff time by 15% through structured component documentation

Reduced design revisions by 20% by aligning stakeholder expectations earlier in the process

Federal Ministry Of Education, Nigeria

Senior Product Designer

July 2025 - September 2025 (3 months)

I led design for Nigeria's first digital Performance Management System, a civil service reform platform serving 67,000+ federal employees across ministries, departments, and agencies.

Built information architecture supporting dynamic roles and real-time performance tracking

Designed modular dashboards for Super Admins, Heads of Service, and Officers that sped up approval workflows by 80%

Designed human-centered flows for sensitive features including sanctions, rewards, and leave management
Optimized for low-bandwidth environments and nationwide accessibility
Aligned UX decisions with civil service regulations and data privacy requirements

Sparkr Digitals

Product Team Manager

September 2023 - September 2025 (2 years 1 month)

Lagos State, Nigeria

I led product design operations at Sparkr Digitals, an agency delivering digital products for African startups and businesses.

Managed a cross-functional design team across concurrent fintech, tech, and consumer engagements

Oversaw end-to-end delivery from discovery to final handoff across web and mobile

Set up design workflows and documentation practices that improved team consistency

Mentored junior designers on UX research, UI execution, and stakeholder communication

Chisquares

Senior Product Designer

March 2023 - February 2025 (2 years)

United States

I led end-to-end product design for a research analytics and collaboration platform used by academics, corporations, and public health organizations worldwide.

Built a unified design system across web and mobile, standardizing components and speeding up feature delivery

Designed survey builders, automated data-cleaning tools, and collaborative manuscript writing modules

Drove a 30% lift in user engagement and retention through onboarding redesigns

Ran user research with data scientists, graduate students, and educators to prioritize product decisions

Championed AI-assisted UX approaches across the full product launch cycle

ODEL

UX Design Specialist

July 2022 - February 2023 (8 months)

Riyadh, Saudi Arabia

I redesigned the digital platform for a Saudi management consulting firm.

Lifted conversion rates by 25% through a full UX redesign

Built personas, journey maps, and information architecture for core consulting services

Delivered UX copy, responsive components, and a scalable Figma asset library

PluralCode

3 years 5 months

UI/UX Designer, later Team Lead

January 2019 - May 2022 (3 years 5 months)

Lagos State, Nigeria

I worked with PluralCode, a leading African EdTech institute, across three engagements, growing from supporting designer to team lead.

Led end-to-end design on educational products from user journey to high-fidelity UI

Mentored aspiring designers through UX research, wireframing, prototyping, and design systems

Ran design workshops and put in place documentation practices that improved junior team output

Collaborated with PMs and engineers in agile sprints to ship production-ready designs

UI/UX Designer

October 2020 - March 2021 (6 months)

Lagos State, Nigeria

I designed UI and worked on UX for products at PluralCode, a leading African EdTech institute.

Key contributions:

- Translated brand and marketing strategies into engaging creative content
- Communicated page flows, animations, and interactive elements to stakeholders and engineering teams

- Worked closely with the engineering team to identify front-end issues and implement validated design solutions
- Collaborated across teams with front-end engineers, PMs, and marketing on key product decisions

UI/UX Designer

January 2019 - March 2019 (3 months)

Lagos State, Nigeria

I supported the Senior Designer and got hands-on experience across web and mobile application launches at PluralCode.

Key contributions:

- Assisted the Senior Designer on web and mobile application launches, picking up real-world design processes
- Designed social media and brand content to support product marketing campaigns
- Ran user research and usability testing to inform design decisions
- Followed agile sprint cycles to meet project deadlines

Purchasa

Blockchain UI Designer

July 2021 - December 2021 (6 months)

Melbourne, Australia

I designed web and mobile interfaces for Purchasa, a DeFi and blockchain platform serving merchants, consumers, and retail crypto investors.

Key contributions:

- Cut user errors by 70% and lifted adoption by 25% through onboarding and navigation redesigns
- Designed flows for crypto wallet management, dApp onboarding, NFT marketplaces, and blockchain transactions
- Built interactive prototypes in Figma and Protopie for cross-functional review and stakeholder sign-off
- Aligned all UI with DeFi usability, accessibility, and security standards

Tools: Figma, Protopie

Medicarri

UX Designer

February 2021 - July 2021 (6 months)

Riyadh, Saudi Arabia

I designed web and mobile platforms for Medicarri, a healthcare tech company focused on improving patient and provider experiences.

Key contributions:

- Lifted user satisfaction by 15% and click-through rate by 17% through research-driven UI refinements and A/B testing
- Designed patient booking, health records, dashboards, and care coordination interfaces
- Managed and mentored a small design team, improving output by 20% through agile practices and structured feedback cycles
- Collaborated with engineering and product to translate healthcare requirements into clear, usable flows

TrueSaver

Fintech UI/UX Designer

October 2020 - April 2021 (7 months)

Lagos State, Nigeria

I designed the UI and UX for TrueSaver, a Nigerian fintech app that digitizes ajo — a traditional group rotational savings model — letting users pool funds, access interest-free loans, and manage collective finances on mobile.

Key contributions:

- Designed onboarding, savings group creation, and fund-pooling flows for first-time and repeat savers
- Built intuitive dashboards for rotation tracking, contribution status, and payout schedules
- Ran user research with target savers to break down complex rotational savings mechanics into clear, accessible mobile UI
- Delivered high-fidelity designs aligned with Nigerian fintech usability standards and trust signals

Tools: Figma

وزارة الحج والعمرة - Ministry of Hajj and Umrah

User Experience Designer

August 2019 - December 2020 (1 year 5 months)

Riyadh, Saudi Arabia

I designed UX for Nusuk, Saudi Arabia's official digital gateway for Hajj and Umrah pilgrims. Part of Vision 2030's Pilgrim Experience Program, the platform serves 40M+ annual users worldwide.

Key contributions:

- Cut pilgrim entry waiting times by 35% through optimized service and navigation flows
- Designed scalable user journeys and information architecture for visa issuance, booking, maps, and spiritual guidance
- Built multilingual experiences in English and Arabic across web and mobile for a global audience
- Improved onboarding and usability for 40M+ users through ongoing research-driven refinements
- Partnered with cross-ministry teams on crowd management, emergency readiness, and real-time feedback systems
- Contributed to integrated payment, reservation, and digital mapping flows

Tools: Figma, Adobe XD

Education

National Open University of Nigeria

Postgraduate Degree, Information and System Technology · (June 2026 - April 2027)

Federal University of Technology Akure

Bachelor of Engineering - BE, Mechanical Engineering

Google Mobile Academy

UX Design Certification, UX Design · (January 2021 - May 2021)

Learnoverse

Diploma of Education, The Ultimate Guide to Web3.0 · (December 2022 - December 2022)
